

## Resilient Fitzrovia - Invitation to Cyber Security Workshop

09.00 – 11.30 am

**Wednesday 27 February  
2019**

Workshop to be held in the Fitzrovia area. Further details to be provided upon registration.

Dear Colleagues,  
Resilience First, in partnership with Barclays Bank Digital Eagles and Intel, is planning a workshop for local businesses on improving cyber security. According to the Global Risk Report 2018 presented at the World Economic Forum, cyber incidents are now the second highest business risk around the world (after extreme weather events). **Cyber-security** risks are growing rapidly, both in their prevalence and in their disruptive potential. Many incidents are the result of software glitches, technology outages or human error rather than malicious acts.

To reduce the risk of business interruptions, every organisation, especially small and mid-sized enterprises, needs to reduce their vulnerability to cyber threats by investing in staff training and cyber security policies and practices appropriate to their size and operations.

This interactive workshop will provide a practical approach to building cyber resilience and provide an opportunity to discuss appropriate security measures and share information with other local businesses and organisations in the Fitzrovia area interested in working collaboratively to strengthen their resilience.

If you would like to participate and benefit from this workshop please register via the email below. The workshop is free-of-charge.
