Dear Sir or Madam,

Electric Vehicle Charging Point – Fitzroy Street

We are writing to inform you of the Council's proposal to implement a new electric vehicle charging point outside 12-16 Fitzroy Street.

The council is committed to rolling out a network of electric vehicle charging points to encourage people who live, work, and visit the borough to use electric vehicles when there is an essential need for a motor vehicle.

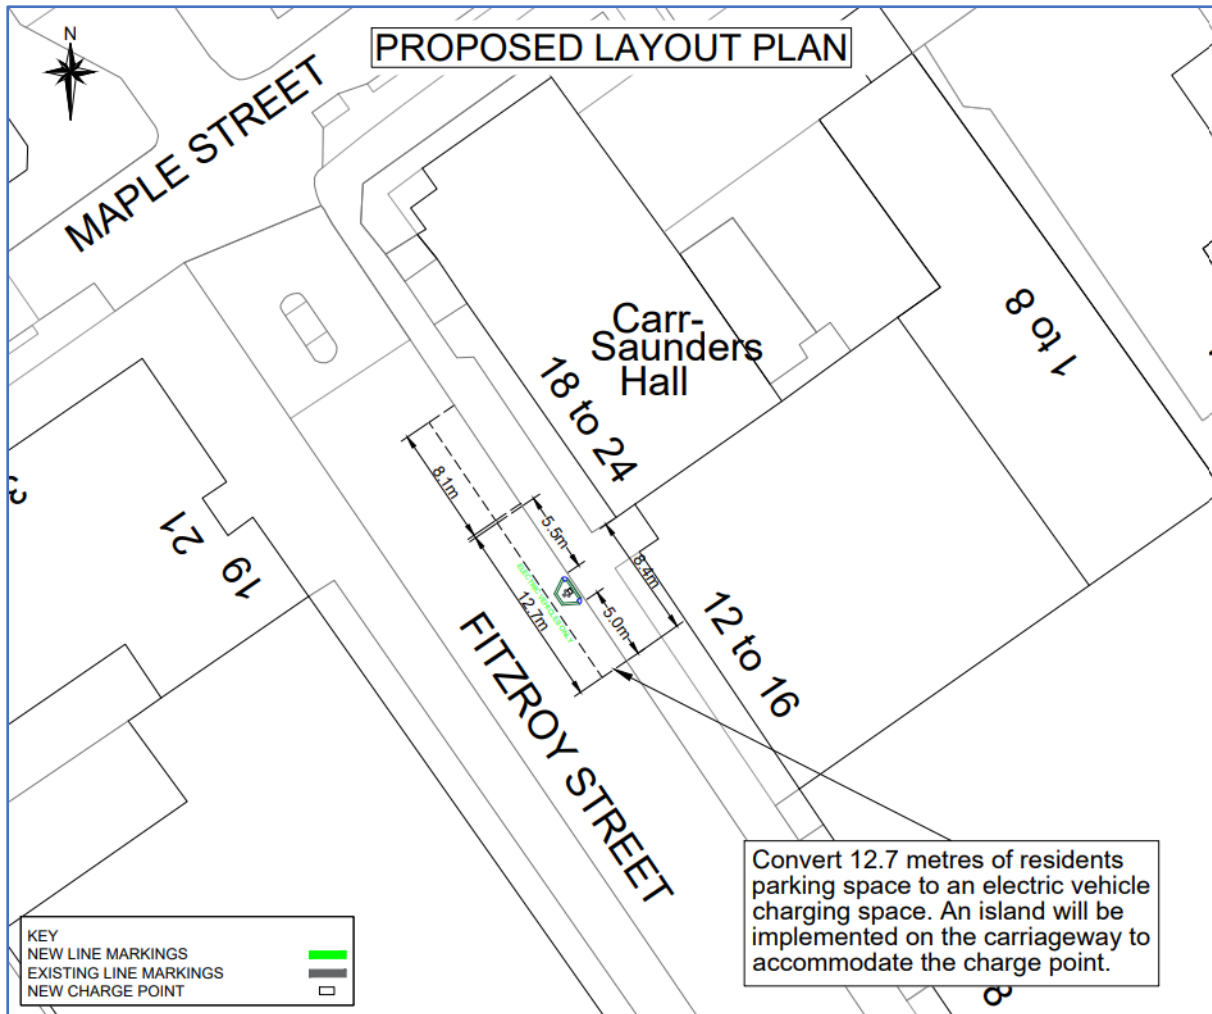

As electric vehicles become more popular the demand for charging points in Camden is growing. Benefits to owning and using an electric vehicle include:

- Exemption from Vehicle Excise Duty, Central London's Congestion Charge (until 2025) and Ultra Low Emission Zone charges;
- Heavily discounted residents' permit;
- Zero tailpipe emissions, contributing to our ambitions to reduce nitrogen dioxide emissions in the borough and assist in improving air quality

A picture of the proposed charge point is shown below and the proposed layout is illustrated in detail overleaf.

Charge Point

Proposed changes – outside 12-16 Fitzroy Street

The proposals consist of the following:

- To convert 10.5m of resident parking space to two electric vehicle charging only spaces.
- To construct a small island on 2.2m of resident parking space for the charge point to be located on.

The proposed works are scheduled to be implemented by September 2022, and will result in the loss of 3 resident parking spaces.

A statutory Traffic Management Order (TMO) consultation will run in parallel to this consultation, which will involve advertising the changes in local newspapers.

Please ensure any comments are received by **21st July 2022** at the following address:
